

# MIDI furniture ... made in harmony with environment.

The MIDI logo consists of the word "midi" in a lowercase, sans-serif font. The letters "mid" are white, and the letter "i" is red. The logo is set against a dark brown rectangular background.

Being a furniture manufacturer you can understand the crucial role of trees in our business. Without them, we couldn't exist.

Fully aware of this reality, we have pushed forward many initiatives to preserve the environment.

- ↪ For each tree that is cut down, a new plantation is done. This is an excellent way of ensuring the renewal of used resources!
- ↪ Every necessary effort is done so the wood that is cut away during production of a MIDI furniture is used for creating marketing tools or other items.
- ↪ Re-using paper is a daily practice. All of our employees are awoken to the fact of using both sides of every sheet of paper before putting it into the recycling bin.
- ↪ All residues coming from different products used by our finishing department are 100% recycled by **CHEMREC**.

- ↪ A structured planning allows to ship MIDI furniture while minimizing the carbonic gas emissions as well as fuel consumption.
- ↪ Quality of MIDI furniture offers an optimum life span. This is a heritage that contributes to protecting your environment and this of following generations. To choose MIDI is an intelligent investment!

The MIDI dining room furniture is made in a business proudly established in Québec province. A responsible business... A GREEN business!

**MIDI furniture:  
a choice that ensures the respect of your future !**

**Long-lasting development: a strategy equalling success !**
